Become an Intern

Marokko Biz of 31.01.12 SARL offers internships within internal IT development.

Our satellite office in Kenitra offers internships within internal IT development primarily.

Under the supervision and guidance of our lead IT developer Asmaé, you will have the opportunity to develop internal software that will also be further developed for external sales.

The program will be developed in PhP, Laval and MariaDB. AI will also be used.

You will receive plenty of feedback throughout the internship period. Asmaé (our leading developer) will provide the necessary backup.

As a developer, you will also be credited for participating in the program.

If you are a student on an IT education and want to be an intern while studying, this may be a good fit for the right person. If person fit into the company's rhythm.

Interns must be physically present at our satellite office in Kenitra. Remote internships are not offered.

Working hours are 09:00 - 17:00 Monday to Friday.

There is no payment during the internship. For the right person, a student job may be considered after the internship period.

A transportation allowance of 10.00 MAD per day is provided

Preferred candidates are at level Bac 3 or above.

If this is of interest to you, please send an application and CV in English to our lead IT developer Asmaé at aea@marokkobiz.com
